

CB-04 — Browser tabs drill

Academy · free worksheet · Track: computer-basics · Pair with module CB-04

0. Worked example (read first, then do yours)

Maria, auto-shop office, Chrome on Windows. She opened three tabs — Academy, weather, webmail — then practiced on the middle one:

Tabs open: Academy · Weather · Webmail

Closed: Weather (X on the tab)

Restored with: Ctrl+Shift+T — Weather came right back

Consult pair kept: Academy + Webmail; closed the extra

1. My browser

- ☐ Safari
- ☐ Chrome
- ☐ Edge
- ☐ Firefox
- ☐ Other: _____
- ☐ macOS
- ☐ Windows

2. Three-tab drill

- ☐ Opened tab 1 (site I chose)
- ☐ Opened tab 2
- ☐ Opened tab 3
- ☐ Switched by clicking tabs
- ☐ Tried Ctrl+Tab or Cmd-adjacent tab shortcut

Sites I used: _____

3. Close & restore

- ☐ Closed one tab (X or Cmd/Ctrl+W)
- ☐ Restored it (Cmd/Ctrl+Shift+T or History → Recently Closed)
- ☐ Did restore a second time

4. Consult simulation

☐ Kept exactly **two** tabs

Tab A: _____

Tab B: _____

☐ Closed extras without closing the whole window

5. When to get help

☐ If tabs still feel impossible after two honest tries, I will book a human — not “push through into AI”
