

TA-01 — Setup + secrets checklist

Academy · free worksheet · Track: terminal-agents · Pair with module TA-01

1. Your OS path

- ☐ macOS (Terminal.app / iTerm)
- ☐ Windows native (Windows Terminal + PowerShell)
- ☐ Windows WSL — Ubuntu (or: _____)

2. Confirm the shell

Command I ran: _____

Result (shell / version): _____

3. Package manager

- ☐ Homebrew (`brew --version`): _____
- ☐ winget (`winget --version`): _____
- ☐ apt (`apt` / Ubuntu in WSL)

Notes: _____

4. Git (optional)

- ☐ `git --version` works — version: _____
- ☐ Deferred on purpose (why): _____

5. Secrets rule (write it)

OK to paste: _____

Never paste: _____

If a key leaks, I will: _____

- ☐ I will **not** paste API keys, tokens, or `.env` contents into chat, tickets, or Academy forms.

6. Done for today

- ☐ New terminal window opens cleanly
- ☐ Ready for TA-02 (Claude Code) — or I stopped because this isn't for me
